Statement of Significance

Last updated on - May 3, 2000

What is significant?

Terang Railway Station, dating from 1889, was constructed by FS Leonard on the Warrnambool-Terang line for the Victorian Railways. It comprises a single storey, hip roofed symmetrical brick station building with a standard iron platform verandah and a basalt faced passenger platform. Distinctive features of the station building include the round arched windows, cream brick dressings to the openings and the porch, a gambrel roof to the porch, and tall octagonal chimney stacks.

How is it significant?

Terang Railway Station is historically and architecturally significant to the State of Victoria.

Why is it significant?

Terang Railway Station is historically significant as a representative and intact example of a station building design that arose from the 'Octopus Act' of 1884.

The railway is architecturally significant as a major contributor to the character of the Warrnambool Railway being a representative and most intact example of the 'Terang' style of station building. A small group of brick station designs (Terang and Camperdown), which feature Romanesque arches to the openings, cement render banding and a broken gable over the entrance.

Permit Exemptions

General Exemptions:

General exemptions apply to all places and objects included in the Victorian Heritage Register (VHR). General

exemptions have been designed to allow everyday activities, maintenance and changes to your property, which don't harm its cultural heritage significance, to proceed without the need to obtain approvals under the Heritage Act 2017.

Places of worship: In some circumstances, you can alter a place of worship to accommodate religious practices without a permit, but you must **notify** the Executive Director of Heritage Victoria before you start the works or activities at least 20 business days before the works or activities are to commence.

Subdivision/consolidation: Permit exemptions exist for some subdivisions and consolidations. If the subdivision or consolidation is in accordance with a planning permit granted under Part 4 of the *Planning and Environment Act 1987* and the application for the planning permit was referred to the Executive Director of Heritage Victoria as a determining referral authority, a permit is not required.

Specific exemptions may also apply to your registered place or object. If applicable, these are listed below. Specific exemptions are tailored to the conservation and management needs of an individual registered place or object and set out works and activities that are exempt from the requirements of a permit. Specific exemptions prevail if they conflict with general exemptions.

Find out more about heritage permit exemptions [here](#).

Specific Exemptions:

General Conditions

1. All alterations are to be planned and carried out in a manner that prevents damage to the fabric of the registered place or object.
2. Should it become apparent during further inspection or the carrying out of alterations that original or previously hidden or inaccessible details of the place or object are revealed which relate to the significance of the place or object, then the exemption covering such alteration shall cease and the Executive Director shall be notified as soon as possible.
3. If there is a conservation policy and plan approved by the Executive Director, all works shall be in accordance with it.
4. Nothing in this declaration prevents the Executive Director from amending or rescinding all or any of the permit exemptions.
5. Nothing in this declaration exempts owners or their agents from the responsibility to seek relevant planning or building permits from the responsible authority where applicable.

* All basic refurbishment works including repairs to buildings and structures, where works are documented and administered by a recognised conservation consultant

* Installation of perimeter fencing

* Installation of new signalling systems and modifications to existing signalling systems

* Modification and replacement of tracks to the extent of the rails, sleepers and ballast

* Installation of new landscaping features but excluding earthworks where more than 1m³ of ground is to be altered

Station Buildings

Exterior

* Replacement of decayed fabric with fabric that matches the original design and profile.

* Installation of new but not removal of existing original significant signage.

* Installation of temporary protective hoardings, screens and the like for the protection against intrusion of vandals and the like provided that no damage is sustained to significant fabric.

* Installation of new damp proofing and making good to match existing, adjacent surfaces.

Interior

* Interior painting but not stripping of existing paint scheme

* Installation of new but not removal of existing original significant carpets/flexible floor coverings

* Installation of new but not removal of existing original significant fixtures and fittings, including clocks, soft

furnishings including curtain tracks, rods, blinds and other window dressings, and the like.

* Installation of new but not the removal of existing original significant signage

* Installation of new partitions provided that no damage is sustained to significant fabric

* Replacement of non-original kitchen and toilet fixtures provided that no damage is sustained to significant fabric

* Installation of insulation to ceiling spaces

* Installation of hooks, nails and other devices for the hanging of paintings, mirrors and other wall mounted works of art.

History

Terang Railway Station is historically significant as a representative and most intact example of a small group of substantial brick station buildings, built during the 'Speight' era. (Richard Speight was one of three commissioners appointed to oversee a massive program of railway capital works, commenced in 1884. Fifty-one country railway stations and eight suburban lines were constructed during this era to varying standards, characterised by substantial brick buildings constructed at important towns, richly decorated timber buildings in less important locations along with many lesser temporary timber railway structures. (Beeston, 1995)

Extent of Registration

1. All of the buildings known as the Terang Railway Station including the station building and associated platforms (B1), as marked on plan 602341 held by the Executive Director.

2. All of the land surrounding the station buildings marked L1 on plan 602341 held by the Executive Director, being part of Crown Land vested in Victorian Rail Track.

This place/object may be included in the Victorian Heritage Register pursuant to the Heritage Act 2017. Check the Victorian Heritage Database, selecting 'Heritage Victoria' as the place source.
