HO200 - Hill, later Birch farm complex, 945 Eltham Yarra Glen Road, Watsons Creek

Location:

945 Eltham Yarra Glen Road WATSONS CREEK, NILLUMBIK SHIRE

Heritage Overlay Number: HO200

Listing Authority: HO

Extent of Registration:

Statement of Significance:

HERITAGE VALUE 2005: Local

SIGNIFICANCE ASSESSMENT

Fabric associated with:

- the Victorian-era,
- the Hill & Birch family tenure.

Hill family later Birch family complex is historically and architecturally significant to the Shire:

- for the distinctive and early building techniques displayed in its construction (vertical slabs) (Criterion B2)
- for the association with pioneering families of the Christmas Hills area, Hill and Birch (Criterion A4, H1)
- for the informal nature of the land tenure, particularly given the number of buildings in the complex, tenure typically associated with gold mining areas such as this one (Criterion A4).

Description

DESCRIPTION

The house has a steep but simply gabled roof form clad with corrugated iron, vertical adzed hardwood slab front wall construction, split palings to the gable ends; rubble freestone chimney at one end (with added gsi flue), pole-framed Graeme Butler & Associates, 2006: 101 Shire of Nillurnbik Planning Scheme Amendment C13 Heritage Assessments verandah (rebuilt?); six-pane double-hung sash windows; T&G bead-edge boarded ledged & braced door; and paling clad rooms added at verandah ends. A slab-clad large fireplace is at the north corner of the house, with a gsi upper claddin added and an internal lining of rubble stone.

The rear facade is different construction, being drop-slab, and sits beneath a rear skillion addition to the main gabled form: this may be more recent construction. The house appears to have been once set up for public display and may have been recreated in part for that purpose.

Outbuildings are reached by a track along the east side of the house, including what may have been a creamery (typical standard inter-war design clad with corrugated iron and lined with 1938 Lysaght Queens Head Australia galvanised sheet iron) and a paling clad gabled out-house. Timber outbuildings of differing eras are to the north-west of the house, with pole framing and paling infill construction and Redcliffe brand corrugated iron. Post and rail (front) and split paling (rear) fence remnants line the front boundary. Pepper trees part of house yard landscape .

Integrity

(See above)

Outbuildings in poor repair.
