

NATIONAL TRUST

Every moment an amazing story

Victorian Heritage Database place details - 23/11/2017
Sequoia sempervirens

Location:

Cement Creek Road, WARBURTON, YARRA RANGES SHIRE

Extent of Registration:

Statement of Significance:

Contribution to landscape

Outstanding size

Aesthetic significance

The Californian Redwood (*Sequoia sempervirens*) trees were planted by the Board of Works in about 1930 following clearing of the original eucalypt forest. Trees planted were: Bishop Pine, Douglas Fir and Californian Redwood. Further plantings of Radiata Pine, Western Red Cedar and Redwood took place in 1960-63. The plantations were selected for experimental purposes as part of the Board's hydrogrogy research program.

The Cement Creek plantations provided small lots in which to study the canopy interception results in comparison with native forest trees in the Coranderk area. The results of experiments are not known.

There are over 1476 trees ranging from 20 metres to the tallest being 55 metres. They are in good condition and as they are planted in a grid are aesthetically pleasing to the eye. They are a contribution to the landscape by the sheer number of trees as well as containing possibly the tallest and interesting *Sequoia sempervirens* in Victoria.

Measurements: 30/08/2009

Girth (m): 5.83

Spread(m): E-W 10; N-S 12

Height(m): 54

Estimated Age (yrs): 79

Condition: Good

Access: Unrestricted

Classified: 07/12/2009
