T11155 Jubaea chilensis

Location

St Kilda Botanical Gardens, Blessington Street,, ST KILDA VIC 3182 - Property No T11155

Municipality

PORT PHILLIP CITY

Level of significance

Regional

Heritage Listing

National Trust

Statement of Significance

Last updated on - June 8, 2004

Location or Context:

A tree which occurs in a unique location or context and so provides a contribution to the landscape.

Rare or Localised:

A tree of a species or variety that is rare or of very localised distribution.

This species was planted around Victoria during the late 1800s. Examples are known to occur in Melbourne, Geelong, Kyneton and Bendigo. In Chile the massive trunks have long been felled as a source of sap yielding commercial palm honey and as such few wild stands remain.

Measurements: 28/04/1988

Spread (m): 4
Girth (m): 2.9
Height (m): 8.8
Estimated Age (yrs): 100
Condition: Good

Access: Unrestricted
Classified: 08/08/1985

Other Names Chilean Wine Palm,

Hermes Number 70659

Property Number
