Statement of Significance

Last updated on - June 15, 2004

Contribution to historic garden or park
Outstanding example of species

An impressive specimen of this New Zealand species which is rare in cultivation in Victoria. The only other known examples occur at the Royal Botanic Gardens. The tree has grown into an attractive specimen featuring a rounded crown. The species' foliage differs between juvenile and adult stages; the narrow linear leaves are toothed when young.

The tree is located south section of garden, in New Zealand bed
