Outstanding example of species

Located in the Systems Garden, this is a large specimen notable for being a male tree and for its single trunk. The majority of the species is multi-trunked. The tree was planted by Frederick McCoy during Baron von Mueller's time c.1860-1870s and is now part of the remnant collection of plants systematically arranged by taxonomic order in the Garden.
Works in the vicinity have resulted in compaction and root damage to the tree.
