National Trust

Statement of Significance

Last updated on - June 30, 2004

Contribution to landscape
Rare or localised

A fine example of this rarely cultivated species and a valuable addition to the collection of palm species cultivated in the Mildura region. Planted opposite the main entrance to the station within a row of palms comprising five *Phoenix canariensis* to the west, nine to the east, plus three *Washingtonia robusta*, all forming a major landscape feature. This palm was the only example of *Jubaea* observed in the Mildura region
