Particularly old
Outstanding size

Outstanding example of species

This tree is one of the most outstanding in the town. It contains large lower limbs to the north and south and previously had other lower limbs removed. The tree is well structured and requires little arboricultural intervention. Although the tree appears to have a slightly lopsided crown, no evidence of pruning to produce this shape is apparent. Unfortunately, the driveway runs over its root system, but it appears to have been this way for some time.
