Location:
Carapooee West STUART MILL, NORTHERN GRAMPIANS SHIRE

Heritage Status / Level of Significance:
Recommended for Heritage Overlay

Heritage Inventory (HI) Number: H7524-0032
Listing Authority: HI

Heritage Inventory Citation
Heritage Inventory: H7524-0032

Statement of Significance:
This puddler probably dates from the late 19th or early 20th century. It is very weathered but retains some wooden slabbing in the puddling trench and its central pivot post. The slabbing is an unusual surviving feature.

The Puddler, Carapooee West is historically and scientifically important at a LOCAL level as a substantially intact example of an important gold mining technique. Gold mining sites are of crucial importance for the pivotal role they have played since 1851 in the development of Victoria.

Overall the Puddler, Carapooee West is of LOCAL significance.
Description

DESCRIPTION & INTERPRETATION:

Site 66.0. Puddler No 1. (Survival of slabbing suggests late 1890s/20th century date). Puddler. On the western end of the dam's embankment is a well preserved 22 ft diameter puddling machine site. The puddling trench is deep, has sheer sides. Scattered around the puddler sections of the side slabbing. Presumably these have been pulled out by fossickers looking for gold. The pivot post has also been removed from the inner mound. The outlet channel still retains a well preserved timber shoot. Associated with the puddler is a 10 metre wide, 2 metre high bank of wash.

Shallow alluvial sinkings. The sinkings in the gully below the puddler, running to the Rostrons Road, are undisturbed and visible from Centre Road. There is a working alluvial claim in the gully above the puddler/dam.

INTEGRITY/CONDITION: All sites are in reasonable condition.

CULTURAL SIGNIFICANCE:

Sites 66.0, 66.1, 66.2 and 66.3 have:

- Scientific Significance, due to their ability to demonstrate puddling technology and shallow alluvial mining.
